(54) **DEVICE FOR INFORMATION INPUT WITH RESTRICTED ACCESS**

(57) Abstract:

FIELD: computer engineering. SUBSTANCE: device has introduced second decoder 9, second register 10, OR gate 12, memory unit 13, NOR gate 11, AND gate 8. Commutation elements unit 5 has two commutation elements: "record" and "clear". This provides possibility to restrict use of data by means of programming commutation elements that excluded from subsequent operations. EFFECT: prohibition of unauthorized data input. 1 dwg
